SKILLS AND TECHNOLOGY

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), Tailwind CSS, ShadCN/UI, Redux, Material UI

Backend: Node.js, Express.js, NestJS, REST, GraphQL, SQL (MySQL/PostgreSQL), MongoDB

DevOps & Tools: Docker, Git/GitHub, CI/CD, Linux Deployment (Nginx/PM2), Firebase, Vercel, Netlify, AWS (basic)

Others: JWT, API Integration, OOP, Responsive Design, Figma

PROJECT DETAILS

Retail Store POS

[Client](#) | [Live Link](#) | [Server](#)

Elevate your retail operations with our Retail Store POS Client, a comprehensive solution designed to simplify sales processes and enhance inventory and customer management.

- Streamline sales transactions with ease, from adding items and applying discounts to printing receipts, all within a user-friendly interface.
- Stay on top of your inventory by monitoring stock levels, tracking product details, and receiving low-stock alerts to ensure you never run out of essential items.
- Secure your store operations with robust role-based authentication, providing secure access for staff and administrators.
- Generate insightful reports to understand sales trends, inventory status, and customer activities, empowering data-driven decision-making.
- Benefit from seamless integration with our RESTful APIs, ensuring real-time data synchronization and enhanced functionalities with your backend systems.

Technologies Used: MongoDB, Express.js, AntDesign, React, Node.js

TastyTwirl

[Client](#) | [Live Link](#) | [Server](#)

TastyTwirl is your gateway to a delightful culinary experience. This modern web app boasts seamless user authentication, an intuitive shopping cart, and responsive design.

- Enable registration and login via email/password, and provide social media authentication options for personalized user experiences.
- Implement a user-friendly shopping cart with features to add, manage, and view products, including a total cart value display.
- Ensure seamless user experiences across various devices with responsive design for desktop and mobile platforms.
- Enhance user comfort by allowing theme customization with a toggle between dark and light modes.
- Offer convenient and secure alternatives to login, such as social media authentication options.

Technology Used: MongoDB, Express.js, React.js, Node.js

Course Hero

[Client](#) | [Live Link](#) | [Server](#)

Create an analytics dashboard to provide users with insights into assignment performance, including overall completion rates, average marks, and distribution of difficulty levels among submitted assignments.

- Display a summary of the total number of assignments created, completed, and pending. Include a visual representation, such as pie charts or bar graphs, to illustrate the distribution of difficulty levels in submitted assignments.
- Implement a section where users can track their individual assignment completion rates and average marks. Include a line chart to visualize the user's performance trends over time.
- Showcase a timeline that highlights the completion status of assignments over a specified period. Enable users to filter the timeline based on different time intervals, such as weekly, monthly, or custom date ranges.
- Identify and display the top performers based on the highest average marks or consistent on-time assignment submissions. Include user avatars and relevant statistics to celebrate and recognize achievements.

Technology Used: MongoDB, Express.js, React.js, Node.js

EXPERIENCE

Title: Full Stack Developer

Company Name: Wixerd Innovations (Nov 2023 - Aug 2025), **Type:** Full-time, **Location Type:** Remote

As the principal developer, I led the successful execution of two significant projects: a Client Management System and a Project Management System. My responsibilities covered the full spectrum of the development process, from conceptualization through to deployment. I worked closely with multidisciplinary teams to design, implement, and refine core features, ensuring the solutions were robust, scalable, and aligned with client requirements. Leveraging my expertise in the MERN stack, I provided strategic leadership and technical direction, driving the projects to meet and exceed the defined objectives.

CERTIFICATIONS

Complete Web Development Course – Programming Hero (Batch 07)
